

Pack and ship efficiently with Shipping Manager

directly integrated with SAP ERP / S/4HANA

OUTSET / KEY CHALLENGES

- Lack of transparency about shipping status, as tracking outside SAP
- Waste of paper & time (printing, scanning, searching for information)
- Packing error rate without system support

KEY PRODUCT BENEFITS

- Cloud solution: access to all service providers with just 1 connection
- Save up to 2.5 minutes of working time per parcel in the shipping process
- Digital, scan-based and guided packing table integrated in SAP

AVAILABLE FUNCTIONS

Create packages (handling units) and consolidated shipments (transports) via scanner

PACKING

SHIPPING

Tracking directly in SAP, generate proof of delivery, maintain proof of arrival

TRACKING

INVOICE RECEIPT

Evaluate and optimize your freight costs and delivery times

ANALYSIS

Print shipping labels, connect to service provider via web service, tracking emails, paperless customs integration.

Support for invoice verification for your freight costs, also with workflow
