

# NIS2 Support Service

Identifying security gaps, defining risks, closing vulnerabilities.

Our NIS2 Support Service helps you identify security gaps, define risks, and permanently close vulnerabilities – efficiently, securely, and systematically.

## Goal: Maximum security & full NIS2 compliance

- The NIS2 directive introduces comprehensive requirements for cybersecurity, risk management, and reporting processes for a large number of medium-sized and large companies.
- Our NIS2 Support Service assists organizations in efficiently, securely, and systematically fulfilling their compliance obligations – from impact assessment to continuous operation.

## Your benefits: NIS2, relaxed

- Minimal internal effort for full NIS2 compliance
- Quick start through standardized processes & templates
- Combination of organizational & technical security expertise
- Support from experienced security consultants
- Transparent costs, clearly defined milestones
- Optional operation: monitoring, incident handling & reporting

## Three dimensions at a glance

Risk management & governance

Technical security measures (SIEM, monitoring, hardening)

Incident response & reporting / audit readiness

## Our impact

We identify security gaps, define risks, and close vulnerabilities – fully aligned with your NIS2 obligations.

## Why act now?

The NIS2 directive imposes comprehensive obligations in the areas of cybersecurity, risk management, and reporting processes for a large number of medium-sized and large companies. Non-compliance can lead to high fines, liability risks for management and IT leadership, as well as significant operational disruptions. Additionally, many requirements are already considered “state of the art” – delaying action increases effort, risk, and costs.

**Our Service:** Our NIS2 Support Service provides early clarity, reduces complexity, and offers a secure foundation for decisions and modernization. Acting now means minimizing risks and securing competitive advantages.

## Our NIS2 Support Service covers all these areas:

-  Risk Management Processes
-  SOC-/Monitoring-Functions
-  Incident Response and Reporting Procedures
-  Backup and Recovery Strategies, Business Continuity Management (BCM), Business Impact Analysis (BIA)
-  Hardening
-  Supply chain management
-  Encryption, access control, zero trust
-  Awareness Training
-  Verifiable “state of the art” standards
-  Log Management

## Additionally, our NIS2 Support Service offers technical implementation with:

-  Integration with our SIEM
-  Security Monitoring
-  Hosting and Cloud Security Services
-  Hardening Monitoring

## Unlock your full potential

Unlock your full potential – with NIS2 Support Service for maximum security and full compliance.
