

Shift Manager

Unstructured handovers, scattered notes, and inconsistent communication make tasks unclear and reduce efficiency. Teams lose visibility, priorities slip, and there's no reliable audit trail or usable historical data.

Shift Manager solves this by digitizing handovers and centralizing all shift information, giving teams clear visibility, better coordination, and full traceability of every activity.

Main benefits

Streamlined Shift Handover

Ensures all tasks, instructions, and open issues are clearly communicated before closing a shift.

Full Traceability

Provides documented evidence of all actions for audits and compliance.

Centralized Information

Combines schedules, logbooks, and tasks into one digital platform for easy access.

Real-Time Visibility

Gives managers and operators instant insight into ongoing and upcoming activities.

Improved Coordination

Enhances communication between teams and departments, reducing errors and delays.

Historical Data and Reporting

Enables performance analysis and continuous improvement through detailed reports.

Our technology

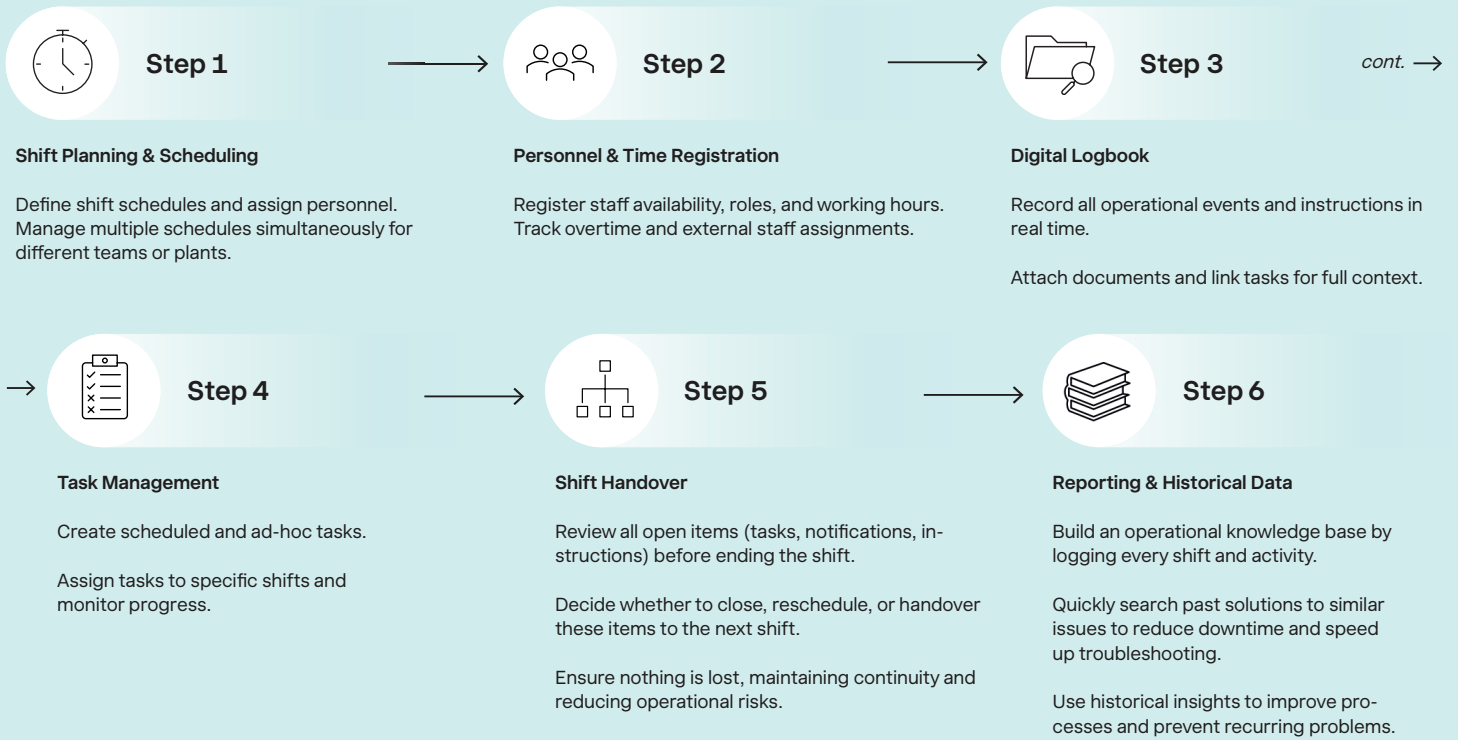

Shift Manager digitizes and centralizes the entire shift handover and communication process, eliminating paper-based workflows and scattered information.

It gives teams real time visibility, ensures consistent and documented handovers, improves cross department coordination, and provides full traceability for audits and reporting.

The Result: Safer operations, fewer errors, and a fully documented, reliable shift management process.

How this works

Product Features

Shift Planning & Scheduling

Create and manage multiple shift schedules simultaneously for different teams or plants.

Personnel Planning & Time Registration

Track staff availability, roles, working hours, overtime, and external personnel.

Digital Logbook

Record operational events, attach documents, and maintain a searchable history for compliance.

Task Management

Schedule tasks, assign responsibilities, and monitor progress with clear handover functionality.

Instruction Management

Attach critical instructions, enforce reading, and trigger time-dependent pop-ups for safety and compliance.

Reporting & Historical Data

Generate shift reports, analyze performance, and access historical data for audits and continuous improvement.

Integration with Other Systems

Seamlessly connects with ERP, maintenance, and permit systems for unified workflows.

Multi-Language & Custom Reports

Supports multiple languages and allows creation of customer-specific reports for compliance and performance tracking.

Orise Digital is the digital innovation arm of Orise, built to connect and optimize the entire digital process and system landscape. With deep expertise in automation, system integration, and process optimization, we deliver industry-proven tools that enhance connectivity, streamline operations, and turn data into actionable insights. Orise Digital helps enterprises integrate technologies seamlessly, boost efficiency, and stay compliant. As the final link in the digital chain, we turn digitalization from vision into reality—empowering smarter, faster, and more informed decision-making through structured, visualized data.
