

SAP Business AI for SAP ERP On-Premise

The fastest path from fragmented reporting to an AI-ready business data foundation

SAP innovations are increasingly delivered cloud-first, leaving many on-premise environments struggling to keep pace. Ready to Run provides a preconfigured business data foundation built on SAP Business Data Cloud, SAP Datasphere, and SAP Analytics Cloud—accelerating analytics, improving decision-making, and preparing organizations for SAP Joule and Business AI.

Main Benefits

Unified Data Foundation

Create a single source of truth with harmonized business data, KPI definitions, and enterprise-wide reporting standards.

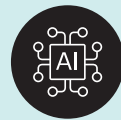

Cloud-ready without redesign:

the ideal starting point SAP ERP on-premise customers looking to transition to RISE or GROW.

Predefined R2R dashboards

provide transparency and accelerate decision-making based on up-to-date, consistent data.

AI-Ready Architecture

Establish a scalable foundation for SAP Joule, predictive analytics, and future AI-driven business processes.

SAP-compliant target architecture

based on SAP Datasphere, SAP Analytics Cloud, and SAP Business Data Cloud instead of siloed solutions.

Faster Time-to-Value

Deploy preconfigured content, dashboards, and data models in as little as five days per module.

Why Act Now?

Three Gaps That Are Holding Back On-Premise Customers

1 Innovation Gap

SAP develops new features and SAP Insight Apps with a cloud-first approach; as a result, on-premise customers are cut off from the innovation pipeline.

2 AI Readiness Gap

SAP Joule and AI-based analytics require harmonized data models, consistent KPI definitions, and clean business semantics.

3 Migration Cost Gap

Every delay increases the cost of transformation because technical debt and accumulated shadow BI landscapes become harder to migrate later on.

Ready to Run: Technology, Content, and Implementation from a Single Source

Foundation: SAP Business Data Cloud, SAP Datasphere, SAP Analytics Cloud

The solution is based on SAP standards, is cloud-ready, and forms the foundation for SAP Joule.

Ready-to-Run Content: Preconfigured Content

KPI catalogs, data models, dashboards, and business logic enable a quick start without the need for time-consuming in-house development.

Expert Services: Implementation with Orise

Onboarding, enablement, enhancements, and AMS support guide you from implementation through to operation.

Rollout Model: Standardized, Fast, Scalable

The standard rollout allows for five days per R2R module and can be expanded on a modular basis or tailored to customer-specific needs.

Unlock your full potential

Get started now on the fastest path to a modern SAP BI and AI platform.

Contact Information:

Orise Digital GmbH, Rheinwaldstraße 38, 78628 Rottweil
+49 741 174416 600
service.DE-ROT@orise.com

As part of the Orise brand, we support manufacturing companies on their journey of digital transformation. Our services range from process planning and optimization to operating models (SAP and non-SAP) and S/4HANA projects, as well as business intelligence, proprietary add-ons, and cloud products. Our focus is on lean principles, SAP standards, and AI readiness. With agility and a collaborative approach, we create sustainable added value and help our clients unlock their full potential – with a personal touch and technological strength.
